

MINI ADJUSTABLE SQUARE CRIMPING TOOL

HSC8 6-4C

HSC9 16-4A

- Applicable for tubular bare terminals and pre-insulated terminals where welding is not needed.
- Terminals to be inserted laterally when crimping.
- Intricately designed crimping dies set and self-releasing integral locking mechanism ensures high quality crimping results, even after long usage.
- When the desired crimping pressure is reached, the lock automatically release the jaws of the pliers; thus resulting in the desired crimping effect.
- High quality lever that allows for effortless crimping
- Forced locking device (releasable) ensures precise crimping in accordance with DIN standards

HSC8 6-4C

Specifications	
Capacity	0.25-10.0mm ²
AWG	23-7
Length (mm)	175
Weight (kg)	0.36

HSC9 16-4A

Specifications	
Capacity	0.25-16mm ²
AWG	23-5
Length (mm)	180
Weight (kg)	0.4
